

Cutting layout

The fabric is folded selvedge to selvedge, so the usable width is HALF the bolt. A piece marked "ON FOLD" sits on that fold.

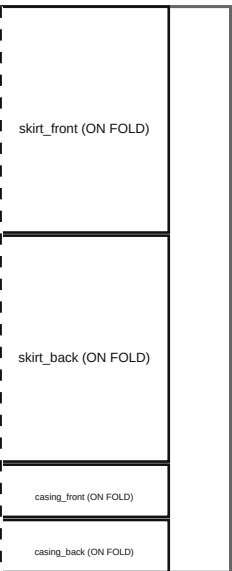

PURCHASE SEPARATELY: 1 x 70 mm wide flat elastic: buy at least 620 mm; the proposed cut length is 615 mm (595 mm loop + 20 mm overlap). Fit it on the wearer before cutting, as sewing guide section 3b says. Not included in cloth yardage.

115 cm wide fabric - layout uses 1.84 m

scale 1:25 . dashed line on the left = the fold . usable width 575 mm
#1 skirt_front: ON FOLD . #2 skirt_back: ON FOLD . #3 casing_front: ON FOLD . #4 casing_back: ON FOLD

150 cm wide fabric - layout uses 1.84 m

scale 1:25 . dashed line on the left = the fold . usable width 750 mm
#1 skirt_front: ON FOLD . #2 skirt_back: ON FOLD . #3 casing_front: ON FOLD . #4 casing_back: ON FOLD

Yardage covers these placements only; shrinkage and matching prints need extra cloth. Keep each grainline parallel to the selvedge. Cut single pieces through the top layer only. CHECKED FABRIC: the layout above is drawn folded for plain fabric. Cut checks single layer, right side up (sewing guide, section 1): open the fabric, lay each piece as drawn and again flipped for its mirrored copy, and add about 0.5 m to the length above to match the checks.
