

Cutting layout

The fabric is folded selvedge to selvedge, so the usable width is HALF the bolt. A piece marked "ON FOLD" sits on that fold. Fold it RIGHT SIDE OUT: the pieces marked RIGHT SIDE UP / FACE DOWN are not symmetric and are cut through the top layer only (paper printed side up / down on the cloth's right side).

PURCHASE SEPARATELY: 1 x 467 mm single-fold bias tape, 12 mm wide, matching the cloth, for the neck facing. Not included in cloth yardage.

PURCHASE SEPARATELY: 2 x 341 mm single-fold bias tape, 12 mm wide, matching the cloth, for the sleeve hem facing. Not included in cloth yardage.

PURCHASE SEPARATELY: 1 x 10 mm sew-on snap (hidden, at the bust level; sewing guide section 3b). Not included in cloth yardage.

Not included in cloth yardage.

Yardage covers these placements only; shrinkage and matching prints need extra cloth. Keep each grainline parallel to the selvedge. Cut single pieces through the top layer only. CHECKED FABRIC: the layout above is drawn folded for plain fabric. Cut checks single layer, right side up (sewing guide, section 1): open the fabric, lay each piece as drawn and again flipped for its mirrored copy, and add about 0.5 m to the length above to match the checks.
